Education

Sri Shakthi Institute of Engineering and Technology **2024 – 2028**
B.E in Computer Science and Engineering *CGPA: 8.43*

Sri Ramakrishna Vidyalaya Matric Higher Secondary School **2024**
Class XII *Percentage: 88.3*

Introduction

Computer Science student with strong proficiency in Full Stack Development and Java, focused on building scalable web applications. Experienced in developing end-to-end solutions using React, Node.js, and MongoDB, with a solid understanding of RESTful APIs and database management. Practicing Data Structures and Algorithms through LeetCode and actively building real-world projects. Seeking an opportunity to apply my skills and grow as a software developer.

Projects

Catering Service Web Application | MERN Stack (MongoDB, Express.js, React, Node.js)
• Developed a full-stack web application enabling users to browse catering menus, place orders, and manage bookings
• Designed responsive frontend interfaces using React and implemented RESTful APIs using Node.js and Express
• Integrated MongoDB for efficient storage and retrieval of user data, orders, and service details
• Implemented dynamic routing and state management to enhance user experience and application performance

Dyslexia Aid System (Ongoing) | MERN Stack, AI
• Developing an assistive web application to support individuals with dyslexia in improving reading and comprehension
• Implementing AI-based text simplification and readability enhancement techniques
• Building an interactive and accessible user interface using React for better usability
• Integrating backend services and database management using Node.js, Express, and MongoDB

Frontend Website Builder (Ongoing) | React.js, JavaScript, CSS
- Developed a no-code website builder that allows users to create and structure websites directly from the UI.
- Implemented dynamic page rendering using configurable components without backend support.
- Designed a hierarchical navigation system with menus and nested sub-menus.
- Built an interactive admin interface for adding, editing, and organizing website content.
- Managed application state efficiently to simulate CMS-like functionality on the client side.
- Created a responsive UI for seamless experience across devices.

Technical Skills

- Languages: Java, JavaScript, C
- Frontend: React.js, HTML, CSS, Tailwind
- Backend: Node.js, Express.js
- Database: MongoDB, SQL ,Firebase
- Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems
- Tools: Git, GitHub, REST APIs,Figma

Areas of Interest

• Full Stack Web Development
• Problem Solving and Data Structures
• Backend Development and API Design
• UI/UX

Achievements

- Solved 70+ problems on LeetCode, strengthening problem-solving and Data Structures skills.
- Earned selection in a competitive internship program organized by iStudio.
- Completed a hands-on workshop in DevOps, gaining exposure to deployment workflows.
